E-ACTI'WATER-P

Our E-ACTI'WATER stainless products

Dwellings - Industrial – Municipalities and other

The solution for structuring water

WATER WIND SUN SA innovates, offering you E-ACTI'WATER with invariable energy, giving you water with its original qualities that protects all your pipes from limescale deposits

Give yourself high quality water

Some advantages...

No more limescale deposits
Spring water
Softer and clearer water
Softer and less dry skin
Moisturizes the body better
Removes toxins more easily
Strengthens immunity
Benefits for animals
Benefits for plants
(half the amount of fertilizer)
Water retains its vitality even after weeks or years

Savings

- Lower use of products
- Preserves appliances from limescaling
- Energy savings of 10 to 20%
(vitalised water heats up faster and stays hot longer)
- No bottled water to buy.
Less pollution due to transportation.

Industry

Provides significant savings to industries while preserving water systems from limescale deposits and scaling. Water that heats up faster reduces one's energy bill..

E-ACTI'WATER

* Existe in several sizes on demand.

Operating principle

'Dead' water enters the E-ACTI'WATER / E-ACTI'WATER-P system (which is composed mainly of minerals) By the eddy movement in contact with the minerals, the water that emerges is structured
